

BRIEF CONTENTS

Acknowledgments	xv
Introduction	xvii
Chapter 1: Getting Started with ComputerCraft	1
Chapter 2: Programming Basics	9
Chapter 3: Talking to Your Turtle	27
Chapter 4: Programming Turtles to Dance	35
Chapter 5: Making a Better Dancer	47
Chapter 6: Programming a Robot Lumberjack	59
Chapter 7: Creating Modules to Reuse Your Code	71
Chapter 8: Running an Automated Tree Farm	85
Chapter 9: Building a Cobblestone Generator	99
Chapter 10: Making a Stone Brick Factory	113
Chapter 11: Constructing Walls	127
Chapter 12: Constructing Rooms	143
Chapter 13: Constructing Floors	153
Chapter 14: Programming a Robotic Farm	173
Chapter 15: Programming a Staircase Miner	191
Function Reference	209
Name ID Reference	217
Index	227

CONTENTS IN DETAIL

ACKNOWLEDGMENTS XV

INTRODUCTION XVII

What Are Minecraft Mods?	xviii
What Is ComputerCraft?	xviii
How to Use This Book	xix
What's in This Book?	xix
Getting Help	xx
Online Resources	xxi
What You Learned	xxi

1 **GETTING STARTED WITH COMPUTERCRAFT** **1**

Installing Minecraft, ATLauncher, and ComputerCraft	1
Buying Minecraft Online	2
Downloading and Installing ATLauncher	2
Downloading and Installing ComputerCraft	4
Running Minecraft	5
Creating a New World	6
Minecraft Game Mode Differences	6
What You Learned	7

2 **PROGRAMMING BASICS** **9**

Getting Started with Turtles	9
Crafting a Mining Turtle	10
Running Programs in the Turtle GUI	12
Fueling the Turtle	14
Moving the Turtle	16
Getting Started with Lua Programming	17
Running the Lua Shell	17
Goodbye Lua: Exiting Lua's Prompt	19
Letting Lua Do the Math	20
Order of Operations	21
That's So Random: Generating Random Numbers	22
Storing Values with Variables	23
Checking the Turtle's Fuel Levels	25
What You Learned	26

3	TALKING TO YOUR TURTLE	27
Teaching Your Turtle to Say Hello!		28
Running the hello Program		29
Listing All Files with the ls Command		30
Displaying Text with the print() Function		30
The String Data Type		31
Stringing Strings Together with Concatenation		31
Retrieving Turtle Names		32
Getting Keyboard Input with the io.read() Function		33
Bonus Activity: Proper Introductions.		33
Giving Text a Typewriter Effect		33
Changing Turtle Names		33
Bonus Activity: A Turtle by Any Other Name		34
What You Learned		34

4	PROGRAMMING TURTLES TO DANCE	35
Writing a Dance Program		36
Running the mydance Program		37
Using Comments in Your Code		38
Turtle Movement Functions		38
Experimenting with Moving the Turtle		39
Looping with for Loops		40
Taking the Turtle for a Spin		41
Doing a Little Hop		42
Bonus Activity: New Dance Moves.		42
Sharing and Downloading Programs Online		42
Deleting Files Off the Turtle		43
pastebin.com Limitations		44
turtleapstore.com		44
Bonus Activity: Maze Runner		44
What You Learned		45

5	MAKING A BETTER DANCER	47
Writing a Better Dance Program		47
Running the mydance2 Program		49
The Boolean Data Type		49
The nil Data Type		50
Looping with while Loops		50
Making Decisions with if Statements		51
Comparing Two Values with Comparison Operators		52
Making Alternate Decisions with elsif Statements		54
Nested Code Blocks		54
Making a Decision . . . or Else!		55
Moving Up and Down		56
Spinning All Around		57
Bonus Activity: Watchturtle		58
What You Learned		58

6	PROGRAMMING A ROBOT LUMBERJACK	59
Equipping Turtles with Tools		60
Designing a Tree-Chopping Algorithm		61
Writing the choptree Program		62
Running the choptree Program		63
Detecting Blocks with the Turtle Detection Functions		64
The not Boolean Operator		64
The and Boolean Operator		65
The or Boolean Operator		66
Terminating Programs with the error() Function		68
Mining Blocks with the Turtle Digging Functions		68
Comparing Blocks with the Turtle Comparison Functions		69
Returning to the Ground		69
Startup Programs and the shell.run() Function		70
Bonus Activity: Going Down		70
What You Learned		70
7	CREATING MODULES TO REUSE YOUR CODE	71
Creating Functions with the function Statement		72
Arguments and Parameters		73
Return Values		74
Making a Module of Functions		75
Loading a Module with the os.loadAPI() Function		76
Experimenting with the hare Module		76
Looking at the Turtle’s Inventory		78
Selecting an Inventory Slot		79
Counting the Number of Items in a Slot		79
Getting Item Details from a Slot		80
The Table Data Type		80
Examining the Table Returned by the turtle.getItemDetail() Function		81
Global and Local Scope		81
Finding an Item with a for Loop		82
Selecting an Empty Inventory Slot		83
Bonus Activity: Dance Move Module		83
What You Learned		84
8	RUNNING AN AUTOMATED TREE FARM	85
Designing a Tree-Farming Program		86
Writing the farmtrees Program		87
Running the farmtrees Program		88
Tree Types in Minecraft		89
Chunk Loading in Minecraft		90
Loading Modules with the os.loadAPI() Function		90
Checking for Files with the fs.exists() Function		91
Selecting Saplings in the Turtle’s Inventory		91
Planting a Tree		91
Inspecting Blocks and Waiting for the Tree to Grow		92

Breaking Out of Loops with break Statements	94
Running Other Programs with the shell.run() Function	94
Handling Items with the Turtle's Drop Functions	94
Rewriting Your Code for When You Have No Bone Meal	96
Bonus Activity: Lone Turtle Farmer	96
What You Learned	97

9 BUILDING A COBBLESTONE GENERATOR 99

Blueprints for the Cobblestone Generator	100
Setting Up Furnaces for Smelting the Cobblestone	101
Writing the cobminer Program	102
Running the cobminer Program	103
Setting Up Your Program and Making a Constant Variable	103
Mining the Cobblestone from the Generator	104
Interacting with Furnaces	105
Making Code Readable with Constants	106
Dropping the Cobblestone into the Furnaces	106
Rounding Numbers with the math.floor() and math.ceil() Functions	107
Calculating the Cobblestone to Distribute in Each Furnace	108
Moving the Cobblestone Miner Back into Position	110
Bonus Activity: Cobble Together More Cobblestone Furnaces	110
What You Learned	111

10 MAKING A STONE BRICK FACTORY 113

Designing a Program to Craft Stone Bricks	114
Crafting a Crafty Turtle	114
Writing the brickcrafter Program	116
Running the brickcrafter Program	118
Setup for the brickcrafter Program	119
Checking the Turtle's Fuel	119
Collecting Stone from the Furnaces	120
Crafting Stone Bricks	121
Moving the Turtle Back into Position	122
Bonus Activity: Cake Factory	123
Creating a Factory Building	123
What You Learned	125

11 CONSTRUCTING WALLS 127

Extending the hare Module	128
Counting Inventory Items with countInventory()	130
Selecting and Placing a Block	130
Designing a Wall-Building Algorithm	131
Writing the buildWall() Function	134
Writing and Running the buildwall Program	137
Loading the hare Module	138
Using the Array Data Type	138
Reading Command Line Arguments	139

XII CONTENTS IN DETAIL

Creating Usage Messages	139
Calling hare.buildWall() to Build a Wall	140
Bonus Activity: mylabel Program with Command Line Arguments	141
What You Learned	141

12 CONSTRUCTING ROOMS 143

Designing a Room-Building Algorithm	144
Extending the hare Module	145
Calculating the Total Number of Blocks Needed to Build a Room	146
Writing the buildRoom() Function	147
Writing the buildroom Program	149
Running the buildroom Program	150
Bonus Activity: Plus-Shaped Rooms	151
What You Learned	151

13 CONSTRUCTING FLOORS 153

Designing the Sweeping Algorithm	154
Building the Floor	155
Returning to the Starting Position	157
Passing Functions to Functions	158
Extending the hare Module	160
Calling the sweepFunc() Function	161
Moving Along the Rows and Columns	162
Figuring Out If a Number Is Even or Odd with the Modulus Operator	163
The Even-Width and Odd-Width Paths	164
Writing the buildFloor() Function	165
Writing the buildfloor Program	165
Running the buildfloor Program	166
Creating a Patterned Floor	166
Writing the buildcheckerboard Program	167
Running the buildcheckerboard Program	168
Writing the placeCheckerboard() Function	169
Calling the sweepField() Function	170
Bonus Activity: Different-Colored Checkerboards	171
What You Learned	171

14 PROGRAMMING A ROBOTIC FARM 173

Setting Up a Wheat Field	174
Designing the Wheat-Farming Algorithm	175
Extending the hare Module	176
Writing the farmwheat Program	177
Running the farmwheat Program	179
Setup for the farmwheat Program	180
Writing Functions to Use in the Main Program	181
Checking the Crop	181
Planting Seeds	182
Storing Wheat	183

Farming with a Loop	184
Bonus Activity: Giant Wheat Fields	186
Tips for Automating Other Kinds of Farming	186
Farming Vegetables.	186
Milking Cows and Shearing Sheep	187
Gathering Chicken Eggs	188
Farming Cacti and Sugar Cane	189
What You Learned	190

15 PROGRAMMING A STAIRCASE MINER 191

Designing the Stair-Mining Algorithm	193
Extending the hare Module	197
Writing the digUntilClear() and digUpUntilClear() Functions	198
Writing the stairminer Program	199
Running the stairminer Program	200
Setup for the stairminer Program	201
Creating the First Stair Step	201
Mining Downward	202
Checking the Turtle’s Fuel	204
Checking the Turtle’s Inventory.	206
Mining Upward	206
Bonus Activity: Tall Tunnel.	207
What You Learned	207

FUNCTION REFERENCE 209

fs (File System) API	210
hare API	210
io (Input/Output) API	211
math API.	211
os (Operating System) API.	211
shell API	212
string API	212
textutils API	212
turtle API	212
Building Functions	213
Fueling Functions.	213
Inventory Functions	214
Movement Functions	215
Perception Functions	215
Tool-Related Functions	216
Lua Functions.	216

NAME ID REFERENCE 217

Finding a Block’s Name ID	217
Distinguishing Between Blocks That Share Name IDs	218
List of Block Name IDs	219

INDEX 227
