CONTENTS IN DETAIL

FOREWORD **xv**

PREFACE **xvii**

ACKNOWLEDGMENTS **xix**

INTRODUCTION **xxi**

What's in the Book xxii

1
FOUNDATIONS **1**

Talking About Memory 2
Memory Terminology 2
Variables in Depth 3
Memory Regions 5
Ownership 7
Borrowing and Lifetimes 9
Shared References 9
Mutable References 10
Interior Mutability 12
Lifetimes 12
Summary 17

2
TYPES **19**

Types in Memory 19
Alignment 20
Layout 21
Complex Types 23
Dynamically Sized Types and Wide Pointers 23
Traits and Trait Bounds 24
Compilation and Dispatch 24
Generic Traits 28
Coherence and the Orphan Rule 28

Trait Bounds 31
Marker Traits 33
Existential Types 34
Summary 35

3
DESIGNING INTERFACES **37**

Unsurprising 38
Naming Practices 38
Common Traits for Types 39
Ergonomic Trait Implementations 40
Wrapper Types 40
Flexible 41
Generic Arguments 43
Object Safety 44
Borrowed vs. Owned 45
Fallible and Blocking Destructors 46
Obvious 47
Documentation 47
Type System Guidance 48
Constrained 50
Type Modifications 50
Trait Implementations 51
Hidden Contracts 53
Summary 56

4
ERROR HANDLING **57**

Representing Errors 58
Enumeration 58
Opaque Errors 59
Special Error Cases 61
Propagating Errors 62
Summary 65

5
PROJECT STRUCTURE **67**

Features 67
Defining and Including Features 68
Using Features in Your Crate 70
Workspaces 70
Project Configuration 73
Crate Metadata 73
Build Configuration 73
Conditional Compilation 78
Versioning 80
Minimum Supported Rust Version 81
Minimal Dependency Versions 82
Changelogs 83
Unreleased Versions 83
Summary 84

6
TESTING **85**

Rust Testing Mechanisms 86
The Test Harness 86
#[cfg(test)] 88
Doctests 90
Additional Testing Tools 92
Linting 92
Test Generation 93
Test Augmentation 96
Performance Testing 97
Summary 100

7
MACROS **101**

Declarative Macros 102
When to Use Them 102
How They Work 104
How to Write Declarative Macros 106
Procedural Macros 109
Types of Procedural Macros 109
The Cost of Procedural Macros 110
So You Think You Want a Macro 111
How Do They Work? 113
Summary 115

8
ASYNCHRONOUS PROGRAMMING **117**

What's the Deal with Asynchrony? 118
Synchronous Interfaces 118
Multithreading 119
Asynchronous Interfaces 120
Standardized Polling 121
Ergonomic Futures 121
async/await 124
Pin and Unpin 126
Going to Sleep 133
Waking Up 133
Fulfilling the Poll Contract 134
Waking Is a Misnomer 136
Tasks and Subexecutors 136
Tying It All Together with spawn 138
Summary 140

9
UNSAFE CODE **141**

The unsafe Keyword 142
Great Power 144
Juggling Raw Pointers 144

Calling Unsafe Functions . . . 147
Implementing Unsafe Traits . . . 151
Great Responsibility . . . 153
What Can Go Wrong? . . . 154
Validity . . . 155
Panics . . . 158
Casting . . . 159
The Drop Check . . . 160
Coping with Fear . . . 163
Manage Unsafe Boundaries . . . 163
Read and Write Documentation . . . 164
Check Your Work . . . 165
Summary . . . 166

10
CONCURRENCY (AND PARALLELISM) 167

The Trouble with Concurrency . . . 168
Correctness . . . 168
Performance . . . 169
Concurrency Models . . . 172
Shared Memory . . . 172
Worker Pools . . . 173
Actors . . . 174
Asynchrony and Parallelism . . . 175
Lower-Level Concurrency . . . 177
Memory Operations . . . 177
Atomic Types . . . 178
Memory Ordering . . . 178
Compare and Exchange . . . 184
The Fetch Methods . . . 187
Sane Concurrency . . . 188
Start Simple . . . 188
Write Stress Tests . . . 189
Use Concurrency Testing Tools . . . 189
Summary . . . 192

11
FOREIGN FUNCTION INTERFACES 193

Crossing Boundaries with extern . . . 194
Symbols . . . 194
Calling Conventions . . . 198
Types Across Language Boundaries . . . 200
Type Matching . . . 200
Allocations . . . 202
Callbacks . . . 204
Safety . . . 204
bindgen and Build Scripts . . . 207
Summary . . . 209

12
RUST WITHOUT THE STANDARD LIBRARY 211

Opting Out of the Standard Library 212
Dynamic Memory Allocation 213
The Rust Runtime 215
The Panic Handler 215
Program Initialization 216
The Out-of-Memory Handler 216
Low-Level Memory Accesses 217
Misuse-Resistant Hardware Abstraction 219
Cross-Compilation 220
Summary 222

13
THE RUST ECOSYSTEM 223

What's Out There? 224
Tools 224
Libraries 225
Rust Tooling 228
The Standard Library 230
Patterns in the Wild 233
Index Pointers 233
Drop Guards 234
Extension Traits 236
Crate Preludes 236
Staying Up to Date 237
What Next? 238
Learn by Watching 239
Learn by Doing 240
Learn by Reading 241
Learn by Teaching 242
Summary 243

INDEX 245
