No Starch Press Partners with Humble Bundle for the Humble Book Bundle: Hacking 101

*Readers pay what they want for a stellar selection
of bestselling hacking and security books*

SAN FRANCISCO (November 30, 2020)—No Starch Press, one of the world’s top tech-book publishers, is partnering with [Humble Bundle](#) to offer the public a curated selection of titles in a pay-what-you-want pricing model, for a worthy cause. This special three-week deal is part of a hugely popular, ongoing collaboration that has raised more than \$2.1 million to date for nonprofits chosen by No Starch Press.

The [Humble Book Bundle: HACKING 101](#) promotion runs Nov. 30 to Dec. 21, 2020, and will benefit the [National Coalition Against Censorship \(NCAC\)](#) as well as the [No Starch Press Foundation](#), a 501(c)(3) created to support hacker communities around the world. This marks the second time No Starch Press will be pairing with the NCAC for a Humble Book Bundle, and the company is again proud to donate proceeds toward the coalition's important work. For nearly 50 years, the NCAC has led an alliance of nonprofits engaged in direct advocacy and education to support First Amendment principles, working at the community level to promote freedom of thought, inquiry, and expression, and opposing censorship.

According to No Starch Press founder Bill Pollock, “We strive to create the best in technical books, and are ardent supporters of the freedom to read. I’m excited to partner with NCAC in this bundle because I believe in their mission, their methods, and their local approach to tackling censorship issues that affect all of us, especially in the publishing industry.”

In expressing his organization’s gratitude for the support, NCAC Executive Director Christopher Finan noted, “The National Coalition Against Censorship is a first responder in the fight against censorship, assisting people who are defending free expression in their communities, including students, teachers, and librarians. The support of No Starch Press means that we can continue to protect the First Amendment rights of all Americans.”

The [Hacking 101 ebook bundle](#)—valued at \$655 USD—includes fan favorites like *Linux Basics for Hackers* and *Practical Malware Analysis*; bestsellers like *Web Security for Developers* and *Black Hat Go*; and classics like *Hacking: The Art of Exploitation* and *The Hardware Hacker* by Andrew “bunnie” Huang.

With Humble Bundle's pay-what-you-want model, readers choose a price they think is fair to unlock different tiers of the 18-book bundle, starting at just one US dollar. They also get to select how much of

their money goes to No Starch Press, to Humble Bundle, and to the benefiting nonprofits. It works like this:
